Public API Document

Introduction

This document outlines only the Public API endpoints.

We try to and will continue to maintain these endpoints in terms of uptime, availability and data accuracy. In the event of any problems with these API endpoints please connect with us on support@nestex.one or via our telegram https://t.me/c/2337991088/9

For more information, please refer to the following section:

Section A: Spot Exchange API
- A.1: Tickers
- A.2: Order Book

All data is in JSON format. Rate limits for public API are kept in the range of 10 hits per minute, and short-term (30 second) caching is activated to reduce the load on our database.

Please consume these API mindfully.

A. Spot Exchange API

Endpoints Overview

No.	Endpoint	Description
A.1.	/tickers	Market related statistics for all markets for the last 24 hours.
A.2.	/orderbook	Order book depth of any given trading pair, split into two different arrays for bid and ask orders.

Endpoint 1 - /tickers (Market Info)

URL - https://trade.nestex.one/api/cg/tickers to get ALL tickers
OR - https://trade.nestex.one/api/cg/tickers/TICKER_ID to get a single ticker

The /tickers endpoint provides 24-hour pricing and volume information on each market pair available on an exchange.

ALL TICKERS OUTPUT FORMAT **/api/cg/tickers**	**SINGLE TICKER OUTPUT FORMAT** **/api/cg/tickers/BTC_USDT**

base_currency	string	Symbol/Currency code of a the base cryptoasset, eg. BTC
target_currency	string	Symbol/Currency code of the target cryptoasset, eg. ETH
last_price	decimal	Last transacted price of base currency based on given target currency
base_volume	decimal	24 hour trading volume for the pair (unit in base)
target_volume	decimal	24 hour trading volume for the pair (unit in target)
bid	decimal	Current highest bid price
ask	decimal	Current lowest ask price
high	decimal	Rolling 24-hours highest transaction price
low	decimal	Rolling 24-hours lowest transaction price

Endpoint 2 - /orderbook (Order book depth details)

URL - https://trade.nestex.one/api/cg/orderbook

The /orderbook/ticker_id endpoint is to provide order book information with at least depth = 100 (50 each side) returned for a given market pair/ticker.

For example https://trade.nestex.one/api/cg/orderbook/BTC_USDT provides the BTC_USDT pair order book

Endpoint parameters:

Name	Type	Description

ticker_id	string	A ticker such as "BTC_ETH", with delimiter between different cryptoassets
depth	integer	Orders depth quantity: [0, 100, 200, 500...]. 0 returns full depth. Depth = 100 means 50 for each bid/ask side. Note that for more liquid or closely priced pairs, the lack of order depth may result in miscalculation of depth/spread.

Example query:
https://trade.nestex.one/api/cg/orderbook/BTC_USDT?depth=10

Example output:
